The solar solution company

ABOUT US

A leading Solar installation company of high repute, Solstellar Pvt. Ltd has been in the field of solar installation since 2017. As the result of the customer-friendly service we offered, the company could achieve steady growth to get it established as a high profile firm in the field of installation and service of solar projects. Hence, we could register it as a private Ltd company in 2022. As the demand for solar installation has increased in recent years and is likely to grow up in future with the interest and involvement of the Government, we hope that our expertise, hard work, dedication, work quality and post- installation service would promote us to achieve more. We have installed hundreds of different projects with capacity ranging from 3 KW to 100 KW across North Kerala belonging to on-grid and off-grid types. Many of them are under central government subsidy scheme - MNRE & PM Surya Ghar Yojana for consumer household projects. We especially focus on installation and services on Households, Commercial buildings and Hospitals.
